Drools Update
LSARC/2008/748

Rick Matthews
SDASH - Archive Products Group
February 2009

Drools Open Source Component Dependencies

- Fast Tracks started two weeks ago
 - > LSARC providing positive comments, which caused corrections.
 - > 8 in the first week, 8 in the second week
- Attached Spreadsheet outlines the components
 - > Adding a community version field (for when Drools requires an earlier version). We will update the dependencies as Drools evolves.
 - > An updated copy will be posted in the case directory on Feb. 9
- About half done with the dependencies
- Drools inception and commitment still planned after dependency cases
